Elevated above the landscape and built on an old anthill lies this beautifully laid out lodge, located in the heart of the Greater Kruger in the Balule Game Reserve. This 6-bedroom safari camp overlooks a winding dry riverbed, bustling waterhole and the Drakensberg Mountain range which carves across the distant skyline. During the heat of the day, relax by the camp's poolside or bird watch from the lodge's vast viewing platform before a midday brunch up at the main camp. Wildlife

The lodge is built in the heart of the Balule Private Nature Reserve which is open to the Kruger National Park. This wild and diverse reserve is home to the big five and overall a vast array of wildlife. The camp itself overlooks a winding dry riverbed and waterhole and there are also natural springs dotted in the riverbed, many animals are drawn to the little oasis. This undulating landscape means that there are many great vantage points perfect for spotting any movement below from the towering giraffes, herds of elephants to the bushveld's predators.

The flowing waters of the Olifant's River run through the reserve and life can always be found here and you're almost guaranteed to see large pods of hippo and basking crocodiles. The Balule birdlife is second to none with a huge variety of riverine species drawn to the winding waterway. The rare pel's fishing owl has quite often been seen as well as kingfishers, herons, vultures and many eagle species. However, a perfect location to observe the birdlife, is at the camp itself – where a tawny eagle's nest can be seen in front and vibrant sunbirds are attracted by the flourishing gardens her. Bird-watching at camp is a true highlight.

Game Drive Vehicles

On game drives you are able to get a lot closer to big game. The animals are generally habituated to the vehicle. This means that they are used to the vehicle approaching them and know that it never causes them harm. This enables to you to get within five to 10 metres of the large animals – and safely! All game drives are conducted in open 4 x 4 Toyota Land Cruisers or Landrovers.

Malaria

The Balule region is a low-risk malaria area. It is best to consult your local Doctor for advice. Generally, the type of medication needed for the Kruger area is Malarone, Doxycycline or Melfloquine. Mosquitos are more prevalent in the wet, warmer season. Mosquito repellent and creams are also great preventative measures.

Weather

The average mean rainfall for the year is 350mm, with most rainfall occurring during mid-summer (November – February). The rainfall generally occurs in the form of thunderstorms where a downpour is experienced, very seldom lasting longer than a few hours. The mean average maximum temperatures range from 24.5°C in July to 31.5°C in January with the mean monthly minimum occurring in July at a temperature of 8.5°C.

General

All information is subject to change without prior notice, changes would always be in consideration of your safety first and a better-quality experience. This would be where we are able to make improvements, sometimes last-minute decisions due to the nature of the tour/event. Travel times and campsites can change depending on road or weather conditions, or any unforeseen circumstances. These are used as a guideline only.

Special Requirements

Please confirm to us in writing if you are a vegetarian/vegan or if you suffer from any allergies (i.e nuts, milk, fish etc.). Where possible our guides do try and accommodate clients with intolerances (i.e. gluten, lactose), however we cannot guarantee the availability of speciality foods en-route and we therefore recommend you to bring these items with you or purchase them prior to departing on your tour.

Luggage

We advise clients to be as light as possible when travelling through Africa. It is not a destination where you want to lug suitcases and heavy bags around. Lodges rarely have suitcase ramps meaning wheels are sometimes more of a hindrance and also impact on the case fitting in the lockers.

What to pack:

The climate in the Kruger Lowveld brings the hot summer months between October and April when the rainfall is high, and so is the temperature, reaching over 40 degrees Celsius. The dry winter months begin in May and carry on until October/ November, during which time the weather is mild during the day with temperatures averaging mid to high 20s, while very cold in the evenings and early mornings.

- Throughout the year, we recommend packing lightweight, neutral-coloured clothing with short sleeves.
- Bring sun protection in the form of sunblock, sun hats, and glasses.
- Insect Repellent.
- Scarfs, jackets and gloves are needed for early mornings on game drive, especially in winter.
- Comfortable walking shoes as well as open sandals for when the weather is hot.
- Cameras & Binoculars for the many wildlife sightings and day-trips on your visit to South Africa
- Adaptor plug
